

**A truly unique event, combining an exhibition
with a high level world renewable energy forum**

Scan-REF Oslo/Norway 1-2 October 2008

This will be the premier exhibition and conference for anyone interested in renewable energy. The main objective of Scan-REF is to create a world leading meeting place for executives in the renewable industry, based on a Scandinavian market platform. Scan-REF will provide both an industrial, technical and policy platform combined with an Investor seminar, attracting CEO's, top executives and other high level stakeholders. Use this unique opportunity to meet key decisions makers in the Nordic Region and EU, and to participate among industry leaders in a forum for future industrial development.

This will be a week full of events

Social events

WE'RE AIMING FOR THE TOP

Scan-REF sets out to attract decision makers and key personnel from the world's renewable energy industry - policy makers and the political establishment in Europe and North America; the capital markets and financial institutions; industrial companies; industry experts/consultants and other influential people

THE FORUM

The conference will consist of 9 different sections and seminars featuring more than 75 top-level industry speakers, including 5 Energy Ministers (invited).

THE EXHIBITION

The exhibition will offer an intimate arena for meeting up with major players within the industry. On the exhibition floor you will find equipment suppliers and other professionals involved in renewable energy management, governmental affairs and regulations.

WHY EXHIBIT?

If you want to meet an audience who are genuinely interested in the renewable energy sector, Scan-REF is the place to be.

This is your chance to

- present your company and products to a global and responsive audience
- meet the conference delegates (More than 1000 delegates expected to attend)
- meet potential buyers and industry figures face-to-face in one place at one time
- launch and demonstrate new technology, products and services
- do deals and arrange private business meetings through the event
- gain feedback and collect market research
- build prospect databases and generate sales leads
- position your company as a market leader

WHO SHOULD EXHIBIT?

Any company with an interest in these technologies is encouraged to exhibit

- Solar energy
- Wind energy
- Hydropower
- Wave energy
- Osmotic power
- Geothermal energy
- Bioenergy (stationary)
- Hydrogen technology and fuel cells
- CO2 capture
